"A Recreation Place by the Seaside Is One of the Best Things for the Public," He Says, and Comptroller Grout Expresses a Similar View.

A half dozen landscape gardeners the better class of hotel-keepers would also favor it."

Comptreller Edward 35. Grout has given a great deal of thought to the project since the fire.

"It is an excellent idea!" he said. "un-

a preliminiary survey of the destroyed section with a view to turning it into the grand concourse that the Evening World is advocating, and which has the support of all citizens.

Democrats and Republicans alike avor the park. From investigation if avoid appear that the cost for acquiring the land in the burned section would be very much less than has been acretofore estimated.

For two years the Evening World has advocated a grand concuorse for

For two years the Evening World has advocated a grand concurse for the public in place of the dives that until the figs swept them out of existence lined both sides of the Bowery, but the only stumbling block was the great cost.

Without making a survey of the property, experts estimated that to carry out the plan on a practical scale a broad four dwalk, huge bathing houses, founas, new plers, recreation places and "gym" would cost between \$10,000,000 and \$15,000,000.

About the only persons who are opposed to the scheme of a concourse are some of the dive-keepers themselves. They fight on the principle that the harder they fight the more money they will get for their property. The larger places, however, are in favor of the Local Board of Improvements, then referred to the Park Department, every member of which is in favor of the concourse, and then it will be up to the Board of Estimate and Apportionment to pass on the necessary.

The larger places, however, are in favor of the concourse, and then it will be submitted to the Local Board of Improvements, then referred to the Park Department, every member of which is in favor of the concourse, and then it will be up to the Board of Estimate and Apportionment to pass on the necessary.

Injuries: Bowery.

About the only persons who are opposed to the scheme of a concourse are some of the dive-keepers themselves. They fight on the principle that the narder they fight on the principle that the favor of the concourse, and then it will i

Apportionment to pass on the necessary appropriation.

The authorities have plenty of time to act on the project, because none of the dive-keepers who lost everything in the fire is anxious to begin building until the spring. Of the 300 who suffered, more than half are ready to self out now.

FOR SALE

Mayor Low was not too busy with election yesterday to express his opinion on the plan suggested by the Evening Vorld.
"Both as a public official and a private

citizen." he said, "I nave always favored recreation places for the people. I believe as Dr. Lederle does that there gannot be too many parks for the pople. Of course, we all understand that it is not always convenient to spend large amounts of money for such plans, but in the present administration we have tried to devote as much money as was available for the development of parks in all boroughs.

Good Thing for the Public. "A recreation place by the scuside is the very best thing for the public. Coney Island has a fine beach and with a concourse substituted for the ram-snackle buildings there would be little work for the police. I should think

BIG CRUSH OF IMMIGRANTS.

Election Day Causes Congesti Business on Ellis Island.

Owing to the suspension of business Ellis Island yesterday for election, there is a great crush of immigrants there to day, more than half of whom were obliged to spend the night on board ships by which they arrived.

The total number to be disposed of to-day already on hand is 6.123, with sev-eral ships of large manifest due to ar-rive during the day.

The ships and quotas are as follows: Calabria, 655; Moitke, 1.675; Patria, 500; Rotterdam, 523; Finland, 1.150; Ethlop.a, 180; Friederich der Grosse, 1.125.

WEIGHING VEGETABLES.

In a Western City the Idea I

Thought Practical. An agitation favoring the handling of green groceries by weight has been started in Cleveland again, and the in-tention is to push the matter along until some decisive action can be takent.

The innovation of buying and selling The innovation of buying and selling potatoes, apples, melons, sweet potatoes, tomatoes, peas, beans, berries, pickles, and, in fact, all articles handled in bulk, by grocers, is "up to" the grocers themselves. There is no State law or city ordinance governing the matter, and the law regulating the size of a barrel, even, is declared to be a dead letter. Consequently, the grover who buys a barrel of potatoes at the commission-house has no idea of how much he has bought; nor can he fix a retail price until he determines the quantity he has purchased at the wholesale price. Liberality of clerks in adding a potato or two to a peck measure full is simply an additional uncertainty of the measure system of handling, and the varying sizes of berry boxes created unequal conditions in cases of competition. Fresh fruit will weigh more than dried up, stale stuff, and the purchaser is thereby protected to an extent greater than under the measure system. Cooks and chefs, too, who require exact weights of the different materials that go into their dishes can buy more accurately under the weight system. The selling of leggs need not be altered, for in selling by the dozen exactly the same amount as is purchased is sold, and the number of eggs, if not the exact amount of egg meat contained therein, is known.—Cleveland Leader.

TOREADOR'S FEAT.

The death of the famous Spanish toreador, Reverte, recalls to the London Globe one of the most thrilling incidents ever witnessed in the arena. It was at Bayonne. After disposing of two bulls Reverte had twice piduged his sword into a third of great strength and ferocity and as the Beast continued careering wildly the Spaniard shouted. "The bull is slain!" and throwing authorisms in the middle of the ring. He was right, but he had not allowed for the margin of accident. The wounded beast turned, bounded at him, and as he sprang he sunk in death, with his last Tort giving one fearful lunge of the was that drove a horn, into the thigh and the kneeling man and faid there the TOREADOR'S FEAT.

and be kneeling man and laid bare the stafform the knee to the joint.
